

New Product Bulletin - Ballast/LED Driver Boxes

With the increase of remote electronic ballast and LED driver applications, there is a growing need for suitable metal boxes. Below is a selection of our standard sizes, however using our stamping and CNC capabilities, Tripair have the ability to produce anything you need.

The driver boxes contain a mixture of holes and/or knockouts; any of which may be removed to suit your application requirements. Additional holes, ground wires, and other features can be added.

Item #	Description	Length	Width	Depth	Material
1387-10	Heavy Duty Box, 4-1/2" L	4-1/2"
