

New Product Bulletin – L-Bar™ Commercial Bar Hanger

In response to customer requests for a “commercial bar hanger”, we are pleased to unveil our L-Bars™. Besides having the robustness that so many have been demanding, these offer so many benefits and useful/logical features that we are convinced that they will become the new standard.

Consisting of identical L-shaped members, two L-Bars form a rigid ½” X 1 ½” C-Channel shape when assembled, fitting into the C-channel notches in Tripar’s 1254 Butterfly Bracket and most other Butterfly Brackets containing notches for C-Channel.

Features include:

1. Extendable to fit spacing from 12” spaced joists to 24” T-Bar
2. Fastenerless extension locking - accessible from side or bottom
3. Self-locking in Tripar’s 1254 Butterfly Bracket
4. Marking lines for 16”, & 24” joist spacing & 24” T-Bar allow for locking before ceiling installation
5. 36”-48” extension with addition of 1-2 more identical & locking L-Bars
6. Integral formed & barbed nail
7. Underside Tabs/slots for joist positioning, lateral adjustment, and even removal
8. T-Bar slot and locking screw feature

Item #	Description
